# PALEOSCAN™

Integrated Seismic Interpretation Software

DATA CONNECTOR - RELEASE NOTES
Petrel®

PaleoScan^{TM} Data Connector 2022.1.0

Petrel® to PaleoScan^{TM}

Feature	Description
CRS	CRS options have been added to specify which type of CRS is kept during the transfer: • Project CRS corresponding to Petrel® project CRS • Object CRS defined in Petrel®.
Project Loading	Improving the PaleoScan™ project loading when starting Petrel® Data Connector plug-in. Now the project loading is instantaneous and it can be quickly updated with another project in case the last used project is incorrect.

PaleoScan^{TM} to Petrel®

Feature	Description
Object naming	Fix crash when using special characters for transferred objects from PaleoScan™ to Petrel®.
CRS	CRS options have been added to specify which type of CRS is kept during the transfer: • Project CRS: it corresponds to the target Petrel® project CRS • Object CRS: it takes the object CRS from PaleoScan™.
Volume	Fixing and improving performance transfer of volumes when transferring to Petrel®. Now the speed transfer is faster that the previous version of PaleoScan™ Data Connector.

Licensing

The PaleoScan™ Data Connector 2022 is included as an add-on module to PaleoScan™ 2022. It can be downloaded from Eliis web site. A personal user account is required. If you do not have a login and password to access Eliis extranet, you can fill up this form.

Eliis provides you a free 30-day temporary license to evaluate PaleoScan™ 2022 including the Petrel® plug-in. The temporary license will give you a full access to the software with all add-on modules.

Compatibility

The PaleoScan™ Data Connector 2022.1 is only compatible with Petrel® 2021 and PaleoScan™ 2022.

	Required PaleoScan™ versions	Required Petrel® versions
PaleoScan™ Data Connector 2022.1	PaleoScan™ 2022 (64-bit) and above	Petrel® 2021 (64-bit)
